

8 August 1957

MEMORANDUM FOR: Chief, Operations Staff, CR

SUBJECT : Miscellaneous Items Included in Monthly Statistics

1. As requested, we have analyzed the monthly statistical reports in order to explain the increase during Fiscal 1957 of some 18,000 miscellaneous items received.
2. During the period January - April 1957 an estimated 10,000 ICA incoming airgrams were erroneously included in "miscellaneous" and therefore an adjustment should be made in your Fiscal 1957 summary totals to reflect a decrease in "miscellaneous" and a corresponding increase in "ICA". Our memorandum to you dated 9 April 1957 regarding the "Monthly Statistics for ICA Incoming Airgrams" explains this matter in detail.
3. The balance of some 8,000 items of the increase is due to the recording in the daily receipts since January 1957 United Nations (UN) releases and documents of the Organization of European Economic Cooperation (OEEC) received via the Department of State. It is estimated that we receive about 600 documents a month from each source. This would amount in six months to a total of over 7,000 documents which explains the balance of the increase in the "miscellaneous" total for Fiscal 1957.
